

High Power Grip Cutting Vehicle

FOR SAFETY AND **SPEED**

Introducing our bespoke and dedicated Grip cutting vehicle. Providing a solution to the long standing issue of service strikes during grip cutting. Our 'No Dig' safe approach uses air and water to create grips, instead of traditional mechanical dig methods.

-  Protects tree roots
-  All weather working
-  Patent Pending
-  Removes persons from highway
-  Dust Suppression
-  High pressure air

ALL ROUND CAPABILITY

This robust and compact machine can work in a variety of TM setups and is capable of handling any weather condition. It is designed for single-person operation, with automated work location and recording features that include the capture of images of exposed services.

BENEFITS OF APPROACH

- Removes any manual handling
- Avoids third party service strikes
- Dust suppression in dry conditions
- Removes overburden and protects road surface
- Kaarbon Tech compatible
- Records work points
- Image capture
- Improved productivity
