

Quad Fan Suction Excavator

32T

FOR THE FLEET POWERHOUSE

Our quad fan 32T suction excavators are the only of their kind in the UK, featuring a variety of additional operational and safety equipment. Their substantial size, coupled with an additional fan unit, guarantees exceptional power and performance every time.

- Remote drive
- Quad fans
- Right hand tip
- Height & slew restrictor
- High pressure water
- High pressure air

KEY CAPABILITIES

Excavate from a distance of up to 180 metres

Excavate vertically from up to 60 metres

DISTANCE AND DEPTH

Our quad fan units are ideal for excavation projects that require material to be removed from a greater distance or depth. When used in conjunction with extension pipes, the units can remove material from tight or hard-to-reach spaces that conventional methods otherwise would not.
